Alexandria, VA 22313-1450

Sir:

STATEMENT OF SUBSTANCE OF INTERVIEW

In response to the combined telephonic and personal interview conducted between Examiner Doan, the Applicant, Mr. Bruce Rogers, and the undersigned conducted on June 16, 2009, the following is a Statement Of Substance Of The Interview ("Statement") pursuant to 37 CFR § 1.133(b) and MPEP § 713.04.

REMARKS

In the aforementioned interview, the participants discussed the substantial structural and operational differences between Applicant's claimed invention and the newly-cited Blanchard reference, U. S. Patent No. 3,358,698. This Statement summarizes the substance of that interview.

More particularly, it was pointed out by Mr. Rogers and the undersigned that the elastomeric means 68 (FIGS. 12 and 13) of Blanchard biases the members 60 and 62 of the Blanchard device toward either an open or a closed position whereas the presently claimed device has elastomeric means which, significantly, biases the first and second members only toward a closed position and never toward an open position, while also conforming to gathered strands of a user's hair when said hair gripping portions come into contact with gathered strands of a user's hair. The Blanchard device is incapable of functioning in the manner of Applicant's claimed device.

In this regard, Applicant is in the process of having a model of the Blanchard device fabricated to demonstrate its operation to the Examiner -- and its failure to perform as does the presently claimed invention -- in a subsequent combined personal and telephonic interview.

If the Examiner believes that a telephone interview would be beneficial to advance prosecution of the present application, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,

Date: July 14, 2009

John F. Letchford
